## Contract Packaging

Genesee Packaging offers contract packaging services which include kitting, sequencing and light assembly.

We offer our customers a wide variety of packaging alternatives including autobaggers, Gess, shrink tunnel, automated staplers, and tapers. We are available for our customers' needs and are adept at quick turn-around in warehousing, ship direct, and logistics services.

Consigned and Tier One contracted packaging services include:

- Receiving overseas shipments, sorting, unitizing, and distribution

- Hazardous Material Handling certified
- Fully EDI capable
- Fully bar code capable, including RFID

variety of packaging materials from plastic returnable to expendable dunnage, including the application of spray-on or dip rust inhibitors. The products are inspected, packed, labeled, and loaded into sea containers and freight forwarded to vessels bound for the farthest locations on the globe.

### Overseas Shipment

One of our value-added specialties is the packaging of various products for overseas shipment, utilizing a wide

## Engineering and Prototyping

Genesee Packaging has a state-of-the-art prototype lab with complete CAD-CAM capability. The most precise specifications can be met by our computer-driven Kongsberg sample table.

We have an extensive library of packaging designs, or if you require custom packaging, our engineers will assist you in creating the best package design for your unique demands.

Because of the continual increase in the costs of wooden wire bound crates, our engineers developed the corrugated pack shown here.

This weight saving, environmentally friendly design allowed Genesee Packaging to offer a significant savings to our customer.

With our state-of-the-art equipment & engineering expertise, GPI can custom design/engineer secure, reliable, and cost effective packaging for the most demanding applications.

## Commodity Management

Genesee Packaging's commodity management /inventory management service provides its customers a cost effective method to maintain optimal stock levels and minimize procurement and other overhead-related costs associated with obtaining consumable packaging supplies. Our customers are seeking to control inventory cost and obtain cost savings while maintaining a high level of service. When shipped from GPI, your product can be immediately placed on

your shelf with your unique identifying label.

The advantages of utilizing a commodity manager include:

- Reduced supplier base
- Improved communication
- Consistent performance
- Improved quality
- Reduced lead times
- Controlled delivery systems
- Transaction cost reduction
- Quantity discounts
- Reduced delivery costs
- Increased productivity

Whether it is complete commodity management or just to hold your stock in our inventory, Genesee Packaging can provide a solution.

### Light Assembly

Our experience has made Light Assembly a thriving part of our business. As an example, we've attached fuel lines and wire harnesses to modular reservoir assemblies, then tested the product for the proper air/fuel flow. Consider our Light Assembly services for small assembly requirements to save your company time and expense.
